### **Takaichi Supermajority Paves Way for Constitutional Reforms, Beijing Warns of Japanese Militarism**

The 8 February 2026 elections consolidated PM Sanae Takaichi's power as the LDP won 352 of 465 seats, surpassing a two-thirds supermajority. This enables constitutional reforms, including revising Article 9, which renounces war and limits Japan's military to self-defense, potentially expanding forces and spending. Beijing condemned Takaichi's late-2025 remarks threatening military action in Taiwan, part of China under UN Resolution 2758, recognized by Japan. Spokesperson Lin Jian (9 February 2026) urged Tokyo to respect agreements, pursue peaceful development, and warned that far-right recklessness could provoke domestic and international backlash.

## **Beijing Launches US \$80M Aid and 60,000 Tonnes of Rice to Cuba, Vows Continued Support Amid US Blockade**

Following Cuban Foreign Minister Bruno Rodriguez Parrilla's visit to Beijing on 5 February 2026, spokesperson Lin Jian reaffirmed that China would continue to assist and support Cuba in every way possible. On 6 February 2026, Wang Yi denounced external interference in Cuba's sovereignty. By 11 February 2026, Lin Jian reiterated China's commitment to provide help as needed. China's aid includes US \$80 million in emergency funds and 60,000 tonnes of rice, approved by President Xi, as Washington escalates pressure via tariffs on nations supplying oil to the island.

## **Eight Agencies Ban Virtual Currency Businesses on the Mainland as Hong Kong Prepares First Stablecoin Licences**

Issued on 6 February, a joint notice from the People's Bank of China and seven other regulators declared all virtual currency-related business activities illegal and banned the unauthorised offshore issuance of renminbi-pegged stablecoins; five days later, Chief Executive John Lee announced at Consensus Hong Kong 2026 that the city will grant its first stablecoin issuer licences next month, illustrating a dual-track approach to monetary sovereignty and financial innovation under 'one country, two systems'.

### **Water-Saving Industry Exceeds US \$108B as Total Consumption Achieves Zero Growth During 14th Five-Year Plan**

With per capita water resources at merely 35% of the global average, policy-driven efficiency gains under the Three Red Lines framework have kept total annual consumption flat at roughly 600 billion cubic metres since 2015 while GDP continued expanding; water use per 10,000 yuan of GDP declined 20% and industrial water use intensity dropped 25% during 2021–2025, fuelling a sector that already exceeds 760 billion yuan (US \$108.6 billion) and is projected to reach the trillion-yuan scale by 2027.

### Chang'e-6 Far-Side Lunar Samples Revise Decades-Old Crater and Reveal How Giant Impact Reshaped the Moon

Research on 1,935 grams of rock returned from the 2,500 km-wide South Pole–Aitken Basin, published in *Science Advances* and *PNAS*, confirmed that cratering rates were consistent across the near and far sides of the Moon – overturning the long-held Late Heavy Bombardment hypothesis – while potassium isotope analysis revealed that a basin-forming collision some 4.2 billion years ago volatilised deep mantle materials, offering the first direct evidence that such events reshape a planetary body’s internal structure and volcanic activity.

### Brain Network Behind Parkinson’s Disease identified, Enabling Non-Invasive Treatment at a Fraction of Surgical Cost

An international team led by Changping Laboratory identified abnormal hyperconnectivity in the somato-cognitive action network (SCAN) as the mechanism underlying Parkinson’s symptoms, with a targeted transcranial magnetic stimulation trial achieving a 55.5% response rate – 2.5 times the control group – at under 200 yuan (approximately US \$30) per session, compared with approximately US \$30,000 for conventional surgery, offering an affordable option for more than 10 million patients worldwide.
