We Are the Shadow-Ghosts, Creeping Back as the Camp Fires Burn Low: The Twentieth Newsletter (2019).
Dear Friends,

PS: our offices regularly have meetings and events. This Friday (17 May), our office in Buenos Aires will hold a discussion on Vijay.

Warmly,

If we do something about it.

Professor Sandra Díaz, who teaches in Argentina’s National University of Córdoba and is the co-chair of the IPBES report, has said... eco-diversity are ‘declining fast’, ‘we still have the means to ensure a sustainable future for people and the planet’.

And we are going

The corroboree is gone.

The bora ring is gone.

The eagle is gone, the emu and the kangaroo are gone from this place.

The scrubs are gone, the hunting and the laughter.

Gone now and scattered.

We are nature and the past, all the old ways

We are the shadow-ghosts creeping back as the camp fires burn low.

In 1964, Oodgeroo Noonuccal, a poet from Minjerribah (in the land known as Australia) wrote

How can you own that which outlives you?

The Masters of War are spending more time provoking war in Iran and... ‘different ways of reorganising the world and redistributing the planet among all its inhabitants, humans and non-humans’. But to believe that a socialist approach could halt the annihilation of fossil fuel capitalism is not sufficient. Even if... The reservoirs of the Left’s power are low, the weaknesses apparent. The Left has to be built and built in a hurry.

Käthe Kollwitz,

The transition would ‘entail a shift beyond standard economic indicators such as gross domestic product to include those... Unable to give a name to all this, the reports suggest that the only human-led antidote to extinction is socialism.

The UN report challenges orthodox economic thought – the science of capitalism. Rather than ‘abstract economic goals’ –... patterns and that shape waste. Not everyone lives at the same exorbitant standard, and not everyone has to be a

Last August, six Finnish academics released their background... needed not only in the energy sector, but in the very design of our societies if we can move global net emissions to zero... cumulative, it would be a sufficiently large fund to reconfigure energy, transport, housing and food systems.

The proposals in the UN report are ambitious and are blind to the differential needs of the wealthy and the poor. For... co-housing. Current food distribution systems allow 33% of all food harvested to go to waste. Far better, therefore, to

Naomi Phillips and Thomas Hasel,

The rate of global species extinction is tens of hundreds of times faster now than it was over the last ten million years. It is an impossible report and philosophically apocalyptic. The natural environment stands about 100 million years distant relative to the 300 species, and then 100 million species, about 400 if and having club address that feels some interest on the day?

The country’s investment in research in biodiversity is very low, given the importance of biodiversity for human and ecosystem health. The country should increase the national budget allocated to biodiversity. The country should increase the national budget allocated to biodiversity. The country should increase the national budget allocated to biodiversity. The country should increase the national budget allocated to biodiversity. The country should increase the national budget allocated to biodiversity. The country should increase the national budget allocated to biodiversity. The country should increase the national budget allocated to biodiversity.
